

SUBSIDENCE / HEAVE & LANDSLIP

ENSURING THE FAIR TREATMENT
OF THE CLAIMANT HAS ALWAYS
BEEN OUR UNDERLYING PRIORITY

An insurance claim for rectification of structural damage to a building resulting from ground movement is a complex matter. Notwithstanding the formulation of the claim, there is the need to accurately identify the cause of the damage, followed by the specification for an appropriate scope of repair.

At EAP Envoy we have claims consultants who prepare and resolutely negotiate the claim, together with technical personnel that have many years experience in investigating and formulating repairs for structurally damaged buildings and regularly provide expert testimony for litigation.

Technical services provided by EAP Envoy's staff encompass:

- * Monitoring
- * Geotechnical investigations
- * Remedial scheme design

The combination of which negates the need to source external consultants thereby assisting towards a speedier conclusion of the claim.

The combination of our expertise ensures a full and appropriate repair and also that the work is being carried out properly .

Engaging EAP Envoy will ensure the best interest of the Claimant is looked after whilst at the same time allowing the Claimant free to go about day to day activities.
